

Functional requirements

- Responsive design (mobile and desktop)
- Form validation (client-side and server-side)
- Basic recipe search functionality
- Secure authentication (session management)
- Authorization checks (users can only edit their own recipes, admins can edit all)

Customer Features:

- User registration and login
- Browse all recipes (view recipes from all users)
- View individual recipe details (ingredients, instructions, cooking time, dietary type)
- Create own recipes (CRUD for own recipes only)
- Edit and delete own recipes
- Recipe image uploads
- Add recipes to weekly meal planner (select date and meal time: breakfast, lunch, dinner)
- View weekly meal planner (see planned meals for the week)
- Edit and remove planned meals
- Filter recipes by dietary type (vegetarian, vegan, etc.)
- Update/edit profile information

Admin Features:

- Admin Dashboard
- Admin authentication (admin role in user table)
- Full CRUD on all recipes (can edit/delete any user's recipes)
- User management (view all users, create, edit, block/unblock accounts)
- View all meal plans (see what users are planning)

Non-functional requirements

- Consistent design
- Usability, non-complex components

- GDPR compliant
- Password hashing
- Readability
- Page performance: Min picture size upload for a faster page load
